

Large-Scale Documentation of Floors

fokus
GmbH Leipzig

► *Memleben Church, crypt,*
13th century
digital photomap 1:25

► *Schloß Neuburg a. d. Donau, Dürnitz*
digital photomap 1:25

Digitally rectified images are an economical alternative to graphic plans. The result of the rectification is a true-to-scale photomap, which connects the photographic documentation of the present state with accurate geometrical object information.

To support restorers, in assembling an inventory in museums and collections as well as for documentation purposes digital photomaps in the scales 1:25, 1:10 and larger are provided in high photographic quality and combined into a true-to-scale documentation.

1998	Potsdam	New Palace, Grotto Hall
2001	Sondershausen	Castle, Marstall (stables)
► 2003	Neuburg a. d. Donau	Palace, knights' hall
► 2005	Memleben	Church 13th century, crypt
2006	Quedlinburg	Castle, museum
2008	Potsdam	Paradiesgarten, stibadium
2008	Berlin	Charlottenburg Palace, forecourt
► 2008	Potsdam	New Palace, marble hall

fokus GmbH Leipzig is an engineering company which provides special services in the fields of building surveying, photogrammetry, and image processing. Our scope of services also includes planning and documentation for architects, urban preservationists, building researchers and restorers. We furthermore develop and market industry-specific software. For the preparation of large-scale digital documentation our software package **metigo2D** is used.

► Potsdam, Neues Palais, Marmorsaal

A photogram documentation of the entire floor was done to the scale of 1:1 within the preliminary inspections for the planned preservation measures. It was by order of the restoration department of the Foundation Preußische Schlösser und Gärten Berlin-Brandenburg.
